DESCRIPTION:

Florida Blue uses the following five process/decision variables set forth by the Blue Cross Blue Shield Association for evaluation and assessment of new technologies and applications of existing technologies:

1. The technology must have final approval from the appropriate government regulatory bodies, for example, the U.S. Food and Drug Administration (FDA);
2. The scientific evidence must permit conclusions concerning the effect of the technology on health outcomes;
3. The technology must improve the net health outcome;
4. The technology must be as beneficial as any established alternatives; and
5. The improvement must be attainable outside the investigational setting.

NOTE: For Medicare Advantage products, see the Program Exception section of this guideline.

The list below identifies procedures that do not meet the five process/decision variables listed above and are therefore considered **experimental or investigational**. This listing is not all-inclusive and any procedure or device that is not listed below or is not included in a medical coverage guideline and does not meet the five process/decision variables may be considered experimental or investigational.

Complementary or alternative medicine diagnostic testing (i.e. nutrient & hormone panel testing) is considered **experimental or investigational** as there is insufficient clinical evidence to support the use of this testing for all indications.

Mesenchymal stem cell therapy is considered **experimental or investigational**, unless performed as part of clinical trial, or unless noted otherwise in another Medical Coverage Guideline. Data in published medical literature are inadequate to permit scientific conclusions on long-term and net health outcomes.

Radiofrequency treatment to the nasal valve (e.g., Vivaer) for all indications, including but not limited to the treatment of nasal airway obstruction is considered **experimental or investigational**. The evidence is insufficient to determine that the technology results in an improvement in the net health outcome.

BILLING/CODING INFORMATION:

“S” codes are developed by Blue Cross Blue Shield Association and other commercial payers to report drugs, services, and supplies. They may not be used to bill services paid under any Medicare payment program.

REIMBURSEMENT INFORMATION:

None applicable.

PROGRAM EXCEPTIONS:

Federal Employee Program (FEP): Follow FEP guidelines.

State Account Organization (SAO): Follow SAO guidelines.

Medicare Advantage products: This guideline does not apply to Medicare Advantage Products.

If this Medical Coverage Guideline contains a step therapy requirement, in compliance with Florida law 627.42393, members or providers may request a step therapy protocol exemption to this requirement if based on medical necessity. The process for requesting a protocol exemption can be found at [Coverage Protocol Exemption Request](#).

DEFINITIONS:

American Medical Association Category III Codes: Temporary codes for emerging technology, services, and procedures. The inclusion of a service or procedure in this code section neither implies nor endorses clinical efficacy, safety or the applicability to clinical practice. The codes in this code section do not conform to the usual requirements for CPT Category I codes established by the CPT Editorial Panel. For Category I codes, the Panel requires that the service/procedure be performed by many health care professionals in clinical practice in multiple locations and the FDA approval, as appropriate, has already been received. The nature of emerging technology, services, and procedures is such that these requirements may not be met.
