Subject: Step Therapy Requirements for Medicare Outpatient (Part B) Medications

THIS MEDICAL COVERAGE GUIDELINE IS NOT AN AUTHORIZATION, CERTIFICATION, EXPLANATION OF BENEFITS, OR A GUARANTEE OF PAYMENT, NOR DOES IT SUBSTITUTE FOR OR CONSTITUTE MEDICAL ADVICE. ALL MEDICAL DECISIONS ARE SOLELY THE RESPONSIBILITY OF THE PATIENT AND PHYSICIAN. BENEFITS ARE DETERMINED BY THE GROUP CONTRACT, MEMBER BENEFIT BOOKLET, AND/OR INDIVIDUAL SUBSCRIBER CERTIFICATE IN EFFECT AT THE TIME SERVICES WERE RENDERED. THIS MEDICAL COVERAGE GUIDELINE APPLIES TO MEDICARE ADVATANGE LINES OF BUSINESS ONLY.

DESCRIPTION:

The Centers for Medicare and Medicaid Services (CMS) has authorized Medicare Advantage (MA) plans to use step therapy for Part B drugs as part of a patient-centered care coordination program. Step therapy may include a Part B drug before Part B drug and Part D drug before Part B drug. Existing drug therapy must be grandfathered in; therefore, the step therapy program applies to new starts only. Medicare Advantage plans are permitted to require trial/failure of drugs supported only by off-label indication if well supported in accordance with CMS-approved compendia. Beneficiaries must also have the opportunity to participate in drug management care coordination activities, including at minimum: interactive medication review and associated consultations for enrollees to discuss all current medications and perform medication reconciliation and implementation medication adherence strategies to help enrollees with their medication regimen.

POSITION STATEMENT:

Step therapy will be required, and **the definition of medical necessity met**, for the medications listed in the Table below provided **ALL** of the following are met ("1" to "4"):

- 1. The requested product meets the definition of a Medicare outpatient (Part B) drug; AND
- 2. The proposed use of the requested product has been determined to be a medically accepted indication; **AND**
- 3. The proposed use of the preferred alternative product has been determined to be a medically accepted indication; **AND**
- 4. The dose, frequency, and duration of use may not exceed the safety and efficacy data supporting the medically accepted indication

For Non-Preferred Drugs:

- 5. If requested drug is non-preferred, product specific criteria is met (where applicable)
 - ONE of the following:
 - Adequate trial of preferred alternative product OR
 - Contraindication to preferred alternative product OR

• Continuing therapy of non-preferred product (within 365 days)

Exceptions

- Medicare Advantage Products: Medical necessity is determined using any applicable NCD or LCD and then Step therapy Requirements for Medicare Outpatient (Part B) Medications (09-J3000-39).
- Enrollees must be able to request an exception from the plan's step therapy requirement in order to
 access a Part B covered drug. The ability to request such an exception is consistent with current Part
 D rules involving exceptions related to the application of utilization management tools, such as step
 therapy requirements. 42 CFR § 423.578(b)
- CMS considers plan decisions involving requests for exceptions to be pre-service organization determinations because they involve an MA plan's refusal to provide or pay for services that the enrollee believes should be furnished or arranged by the MA plan. 42 CFR § 422.566(b)(3)
- As a result, exception requests are subject to applicable adjudication timeframes and notice
 requirements in 42 CFR §§ 422.568 and 422.572. Organization determination timeframes require that
 MA plans make determinations as expeditiously as the enrollee's health condition requires, but no
 later than 72 hours (24 hours for expedited requests) after the date the organization receives the
 request.

Approval duration: 1 year

Summary of Evidence:

The Step Therapy programs are evaluated based on a thorough review of the available clinical evidence and standards of care, including clinical trials, observational studies, and other relevant data. The program's step therapy protocol is designed to ensure that beneficiaries receive therapeutically effective for their condition, while managing utilization and promoting high-quality care.
