Subject: Amivantamab-vmjw (Rybrevant™), Amivantamab/Hyaluronidase-lpuj (Rybrevant Faspro™)

THIS MEDICAL COVERAGE GUIDELINE IS NOT AN AUTHORIZATION, CERTIFICATION, EXPLANATION OF BENEFITS, OR A GUARANTEE OF PAYMENT, NOR DOES IT SUBSTITUTE FOR OR CONSTITUTE MEDICAL ADVICE. ALL MEDICAL DECISIONS ARE SOLELY THE RESPONSIBILITY OF THE PATIENT AND PHYSICIAN. BENEFITS ARE DETERMINED BY THE GROUP CONTRACT, MEMBER BENEFIT BOOKLET, AND/OR INDIVIDUAL SUBSCRIBER CERTIFICATE IN EFFECT AT THE TIME SERVICES WERE RENDERED. THIS MEDICAL COVERAGE GUIDELINE APPLIES TO ALL LINES OF BUSINESS UNLESS OTHERWISE NOTED IN THE PROGRAM EXCEPTIONS SECTION.

DESCRIPTION:

Amivantamab-vmjw (Rybrevant), a bispecific epidermal growth factor receptor (EGFR) and MET receptor-directed antibody, was approved by the U.S. Food and Drug Administration (FDA) in May 2021 for the treatment of locally advanced or metastatic non-small cell lung cancer (NSCLC) with EGFR exon 20 insertion mutations, in patients whose disease has progressed on or after platinum-based chemotherapy. This indication is approved under accelerated approval based on overall response rate (ORR) and duration of response (DOR). Continued approval of amivantamab for this indication may be contingent upon verification and description of clinical benefit in the confirmatory trials.

The safety and efficacy of amivantamab was evaluated in a phase 1, open-label study of patients with metastatic or unresectable NSCLC and EGFR exon 20 mutations whose disease had progressed on or after platinum based chemotherapy (CHRYSALIS, NCT02609776). Included patients (median age, 62 years) received amivantamab 1050 mg (baseline body weight less than 80 kg) or 1400 mg (baseline body weight 80 kg or greater) once weekly for 4 weeks, then every 2 weeks thereafter until disease progression or unacceptable toxicity.

Amivantamab produced an overall response rate (ORR) of 40% (complete response, 3.7%) in cohort patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) with EGFR exon 20 insertion mutations who had progressed on or after platinum-based chemotherapy (n=81) from the CHRYSALIS trial. The median duration of response (DOR) was 11.1 months, with 63% of patients having a DOR of 6 months or longer. Patients had adenocarcinoma (95%), had received prior immunotherapy (46%), had previously treated brain metastases (22%), and received a median of 2 prior therapies (range, 1 to 7).

National Comprehensive Cancer Network (NCCN) Guidelines for Non-Small Cell Lung Cancer (Version 7.2021) contain recommendations for the use of amivantamab in NSCLC.

POSITION STATEMENT:

Initiation of amivantamab-vmjw (Rybrevant) and amivantamab/hyaluronidase-lpuj, (Rybrevant Faspro) **meet the definition of medical necessity** for any of the following indications when all associated criteria is met:

1. Non-Small Cell Lung Cancer (NSCLC)
    a. Member is diagnosed with recurrent, advanced, or metastatic non-small cell lung cancer (NSCLC)
    b. Amivantamab is used for one of the following:
        i. First line therapy for EGFR exon 20 insertion mutation positive disease in combination with carboplatin and pemetrexed – laboratory documentation of mutation must be submitted
        ii. Subsequent therapy as a single agent for EGFR exon 20 insertion mutation positive disease – laboratory documentation of mutation must be submitted
        iii. First line therapy in combination with lazertinib for EGFR exon 19 deletion or exon 21 L858R disease – laboratory documentation of mutation must be submitted
        iv. Subsequent therapy in combination with lazertinib for EGFR exon 19 deletion or exon 21 L858R disease – laboratory documentation of mutation must be submitted
        v. Subsequent therapy for EGFR exon 19 deletion or exon 21 L858R or EGFR S768I, L861Q, and/or G719X mutation positive disease in combination with carboplatin and pemetrexed – laboratory documentation of mutation must be submitted
    c. Dose does not exceed:
        i. Rybrevant
            1. Used as a single agent or in combination with lazertinib (Every 2-week dosing)
                a. Weight less than 80 kg:
                    i. Initial: 1,050 mg weekly on weeks 1 to 5
                    ii. Maintenance: 1,050 mg every 2 weeks starting on week 7
                b. Weight greater than or equal to 80 kg:
                    i. Initial: 1,400 mg weekly on weeks 1 to 5
                    ii. Maintenance: 1,400 mg every 2 weeks starting on week 7
            2. Used in combination with carboplatin and pemetrexed (Every 3-week dosing)
                a. Weight less than 80 kg:
                    i. Initial: 1,400 mg weekly on weeks 1 to 4
                    ii. Maintenance: 1,750 mg every 3 weeks starting on week 7
                b. Weight greater than or equal to 80 kg:
                    i. Initial: 1,750 mg weekly on weeks 1 to 4
                    ii. Maintenance: 2,100 mg every 3 weeks starting on week 7
        ii. Rybrevant Faspro
            1. Used as a single agent or in combination with lazertinib (Every 4-week dosing)
                a. Weight less than 80 kg:

i. Initial: 1,600 mg weekly on weeks 1 to 4
ii. Maintenance: 3,520 mg every 4 weeks starting on week 5

b. Weight greater than or equal to 80 kg:
i. Initial: 2,240 mg weekly on weeks 1 to 4
ii. Maintenance: 4,640 mg every 4 weeks starting on week 5

2. Used as a single agent or in combination with lazertinib (Every 2-week dosing)
a. Weight less than 80 kg:
i. Initial: 1,600 mg weekly on weeks 1 to 4
ii. Maintenance: 1,600 mg every 2 weeks starting on week 5

b. Weight greater than or equal to 80 kg:
i. Initial: 2,240 mg weekly on weeks 1 to 4
ii. Maintenance: 2,240 mg every 2 weeks starting on week 5

3. Used in combination with carboplatin and pemetrexed (Every 3-week dosing)
a. Weight less than 80 kg:
i. Initial: 1,600 mg on week 1, then 2,400 mg on weeks 2 and 3
ii. Maintenance: 2,400 mg every 3 weeks starting on week 4

b. Weight greater than or equal to 80 kg:
i. Initial: 2,240 mg on week 1, then 3,360 mg on weeks 2 and 3
ii. Maintenance: 3,360 mg every 3 weeks starting on week 4

2. Member has another FDA-approved or NCCN-supported diagnosis, and **BOTH** of the following criteria are met:
a. **EITHER** of the following:
i. Member is diagnosed with a condition that is consistent with an indication listed in the product's FDA-approved prescribing information (or package insert) **AND** member meets any additional requirements listed in the "Indications and Usage" section of the FDA-approved prescribing information (or package insert)
ii. Indication **AND** usage is recognized in NCCN Drugs and Biologics Compendium as a Category 1 or 2A recommendation

b. Dosage does not exceed the maximum recommended in the FDA-approved prescribing information or the maximum recommended by the applicable NCCN guidelines for the diagnosis

Approval duration: 6 months

Continuation of amivantamab-vmjw (Rybrevant) and amivantamab/hyaluronidase-lpuj, (Rybrevant Faspro) **meet the definition of medical necessity** when **ALL** of the following criteria are met:

1. Authorization/reauthorization has been previously approved by Florida Blue or another health plan in the past two years for treatment of NSCLC, or other FDA-approved or NCCN supported diagnosis, **OR** the member has previously met all indication-specific criteria.
2. Member's disease has not progressed on treatment with amivantamab with the following exception:

a. Use is in combination with lazertinib for EGFR exon 19 deletion or exon 21 L858R disease as continuation of therapy following disease progression on amivantamab-vmjw plus lazertinib for asymptomatic disease, symptomatic brain lesions, or symptomatic systemic limited progression

3. Dose does not exceed:
    a. Rybrevant
        i. Used as a single agent or in combination with lazertinib (Every 2-week dosing)
            1. Weight less than 80 kg: 1,050 mg every 2 weeks starting on week 7
            2. Weight greater than or equal to 80 kg: 1,400 mg every 2 weeks starting on week 7
        ii. Used in combination with carboplatin and pemetrexed (Every 3-week dosing)
            1. Weight less than 80 kg: 1,750 mg every 3 weeks starting on week 7
            2. Weight greater than or equal to 80 kg: 2,100 mg every 3 weeks starting on week 7
    b. Rybrevant Faspro
        i. Used as a single agent or in combination with lazertinib (Every 4-week dosing)
            1. Weight less than 80 kg: 3,520 mg every 4 weeks starting on week 5
            2. Weight greater than or equal to 80 kg: 4,640 mg every 4 weeks starting on week 5
        ii. Used as a single agent or in combination with lazertinib (Every 2-week dosing)
            1. Weight less than 80 kg: 1,600 mg every 2 weeks starting on week 5
            2. Weight greater than or equal to 80 kg: 2,240 mg every 2 weeks starting on week 5
        iii. Used in combination with carboplatin and pemetrexed (Every 3-week dosing)
            1. Weight less than 80 kg: 2,400 mg every 3 weeks starting on week 4
            2. Weight greater than or equal to 80 kg: 3,360 mg every 3 weeks starting on week 4

Approval duration: 1 year

DOSAGE/ADMINISTRATION:

THIS INFORMATION IS PROVIDED FOR INFORMATIONAL PURPOSES ONLY AND SHOULD NOT BE USED AS A SOURCE FOR MAKING PRESCRIBING OR OTHER MEDICAL DETERMINATIONS. PROVIDERS SHOULD REFER TO THE MANUFACTURER'S FULL PRESCRIBING INFORMATION FOR DOSAGE GUIDELINES AND OTHER INFORMATION RELATED TO THIS MEDICATION BEFORE MAKING ANY CLINICAL DECISIONS REGARDING ITS USAGE.

FDA-approved

- Rybrevant
    - Used as a single agent or in combination with lazertinib (Every 2-week dosing)
        - Weight less than 80 kg:
            - Initial: 1,050 mg weekly on weeks 1 to 5
            - Maintenance: 1,050 mg every 2 weeks starting on week 7

        - Weight greater than or equal to 80 kg:
            - Initial: 1,400 mg weekly on weeks 1 to 5
            - Maintenance: 1,400 mg every 2 weeks starting on week 7
    - Used in combination with carboplatin and pemetrexed (Every 3-week dosing)
        - Weight less than 80 kg:
            - Initial: 1,400 mg weekly on weeks 1 to 4
            - Maintenance: 1,750 mg every 3 weeks starting on week 7
        - Weight greater than or equal to 80 kg:
            - Initial: 1,750 mg weekly on weeks 1 to 4
            - Maintenance: 2,100 mg every 3 weeks starting on week 7
- Rybrevant Faspro
    - Used as a single agent or in combination with lazertinib (Every 4-week dosing)
        - Weight less than 80 kg:
            - Initial: 1,600 mg weekly on weeks 1 to 4
            - Maintenance: 3,520 mg every 4 weeks starting on week 5
        - Weight greater than or equal to 80 kg:
            - Initial: 2,240 mg weekly on weeks 1 to 4
            - Maintenance: 4,640 mg every 4 weeks starting on week 5
    - Used as a single agent or in combination with lazertinib (Every 2-week dosing)
        - Weight less than 80 kg:
            - Initial: 1,600 mg weekly on weeks 1 to 4
            - Maintenance: 1,600 mg every 2 weeks starting on week 5
        - Weight greater than or equal to 80 kg:
            - Initial: 2,240 mg weekly on weeks 1 to 4
            - Maintenance: 2,240 mg every 2 weeks starting on week 5
    - Used in combination with carboplatin and pemetrexed (Every 3-week dosing)
        - Weight less than 80 kg:
            - Initial: 1,600 mg on week 1, then 2,400 mg on weeks 2 and 3
            - Maintenance: 2,400 mg every 3 weeks starting on week 4
        - Weight greater than or equal to 80 kg:
            - Initial: 2,240 mg on week 1, then 3,360 mg on weeks 2 and 3
            - Maintenance: 3,360 mg every 3 weeks starting on week 4

Dose Adjustments

- See product label for dose reductions due to adverse reactions

Drug Availability

- Rybrevant: 350 mg/7 mL (50 mg/mL) solution in a single-dose vial
- Rybrevant Faspro:
    - 1,600 mg amivantamab and 20,000 units hyaluronidase per 10 mL (160 mg and 2,000 units/mL) solution in a single-dose vial
    - 2,240 mg amivantamab and 28,000 units hyaluronidase per 14 mL (160 mg and 2,000 units/mL) solution in a single-dose vial
    - 2,400 mg amivantamab and 30,000 units hyaluronidase per 15 mL (160 mg and 2,000 units/mL) solution in a single-dose vial
    - 3,520 mg amivantamab and 44,000 units hyaluronidase per 22 mL (160 mg and 2,000 units/mL) solution in a single-dose vial

PRECAUTIONS:

Boxed Warning

- None

Contraindications

- None

Precautions/Warnings

- Infusion-Related Reactions (IRR): Interrupt infusion at the first sign of IRRs
- Interstitial Lung Disease (ILD)/Pneumonitis: Monitor for new or worsening symptoms indicative of ILD
- Dermatologic Adverse Reactions: May cause rash including acneiform dermatitis and toxic epidermal necrolysis
- Ocular Toxicity: Promptly refer patients with worsening eye symptoms to an ophthalmologist
- Embryo-Fetal Toxicity: Can cause fetal harm

BILLING/CODING INFORMATION:

HCPCS Coding

J9061	Injection, amivantamab-vmjw, 2 mg
J9062	Injection, amivantamab 5 mg and hyaluronidase-lpuj

ICD-10 Diagnosis Codes That Support Medical Necessity

C33	Malignant neoplasm of trachea
C34.00 – C34.92	Malignant neoplasm of bronchus or lung
C79.31	Secondary malignant neoplasm of brain

REIMBURSEMENT INFORMATION:

Refer to section entitled **POSITION STATEMENT**.

PROGRAM EXCEPTIONS:

Federal Employee Program (FEP): Follow FEP guidelines.

State Account Organization (SAO): Follow SAO guidelines.

Medicare Part D: Florida Blue has delegated to Prime Therapeutics authority to make coverage determinations for the Medicare Part D services referenced in this guideline.

Medicare Advantage: No National Coverage Determination (NCD) and/or Local Coverage Determination (LCD) were found at the time of the last guideline review date.

If this Medical Coverage Guideline contains a step therapy requirement, in compliance with Florida law 627.42393, members or providers may request a step therapy protocol exemption to this requirement if based on medical necessity. The process for requesting a protocol exemption can be found at Coverage Protocol Exemption Request.

COMMITTEE APPROVAL:

This Medical Coverage Guideline (MCG) was approved by the Florida Blue Pharmacy Policy Committee on 02/11/26.

GUIDELINE UPDATE INFORMATION:

09/15/21	New Medical Coverage Guideline.
10/01/21	Revision: Added HCPCS code C9083.
01/01/22	Revision: Added HCPCS code J9061 and deleted codes C9083 and J9999.
10/15/23	Review and revision to guideline; updated references.
06/15/24	Revision to guideline; updated position statement and dosing (NCCN).
10/15/24	Review and revision to guideline; updated position statement and references.
10/15/25	Review and revision to guideline; updated coding and references.

03/15/26	Revision to guideline; updated position statement and dosing, references; added Rybrevant Faspro
04/15/26	Revision to guideline; updated Position Statement
07/01/26	Revision: Added HCPCS code J9062.
08/15/26	Revision to guideline; updated Position Statement and Dosing/Administration.
